## WORK IN YOUR NEIGHBORHOOD

---

### PROJECT CWF 2016-02: CLOSURE OF REGULATORS 012 AND 020

---

PROJECT AREA: NEW HAVEN - WARDS 9,10, 13, AND 14

#### PROJECT OVERVIEW

As part of the implementation of the City of New Haven Long Term Control Plan, Combined Sewer Overflow (CSO) Regulators 012 (Mitchel Drive) and 020 (Quinnipiac Avenue) will be closed and the existing sewers near the regulators will be rehabilitated.

#### BENEFITS

- Elimination of CSO events to the Mill and Quinnipiac Rivers from Regulators 012 and 020, respectively.
- Restoration of the capacity and extension of the life of the existing sewers being rehabilitated.

#### IMPACTS

- Bypass pumps and piping are required to temporarily redirect flows around sections being rehabilitated.
- Minor excavations are required at manholes to facilitate the lining of sewers. Deeper excavations are required for portions of the sewer requiring replacement.
- Work at Reg. 020 requires the relocation of a gas main.
- Some traffic impacts and detours are expected in the project work area. Traffic will be guided by signage, police, and/or flagman as per City/State requirements.

---

*See the next page for the location of the regulators to be closed and the sewer rehabilitation work*

---

#### TIMING AND COORDINATION

**Construction Start:** Late Summer 2018

**Duration:** Construction is expected to last approximately 3 months per each location followed by final paving.

**Schedule:** Mon-Fri from 9 am to 3 pm. Some activities will require continuous work around the clock.

*\*Due to dynamics of construction schedule, weather and other factors, dates and times are subject to change.*
