

GREATER NEW HAVEN WATER POLLUTION CONTROL AUTHORITY
REQUEST FOR QUALIFICATIONS
PROJECT CWF 2019-03
VALUE ENGINEERING (VE)
FOR CAPACITY UPGRADES TO EAST STREET PUMP STATION FOR CSO REDUCTION
February 2019

The Greater New Haven Water Pollution Control Authority (GNHWPCA) is seeking qualifications from professional engineering firms, independent from the selected design firm (Arcadis) to provide Value Engineering (VE) services specific to the design of the Capacity Upgrades to the East Street Pump Station located in New Haven, CT. The project team qualifications and approach are due on or before Noon March 8, 2019. After the review of the submissions, the GNHWPCA may request firms to meet with GNHWPCA representatives at our offices at 260 East Street in New Haven to present their key team members and approach and to answer any questions.

To obtain a complete description of the Request for Qualifications (RFQ), send an email to engineering@gnhwpc.com requesting the RFQ Information Package.
