

THE ROY AWARD FOR ENVIRONMENTAL PARTNERSHIP

The 2018 Roy Award is just one example of the Environmental Partnerships that GNHWPCA strives to develop and maintain to not only protect our environment but to help others throughout the state and the industry. The Roy Award for Environmental

Partnership was received in partnership with Yale, EMERGE CT, Inc., City of New Haven, and the Common Ground High School, from Harvard University Kennedy School for Science & International Affairs for our "Advancing Green Infrastructure Program". This program's inclusive, community-driven, science-based approach on issues of urban flooding and pollution of waterways which simultaneously addresses the environmental and social challenges facing New Haven, is a model that could be replicated in other cities and communities around the world.

THE JOHN F. KENNEDY SCHOOL OF GOVERNMENT
HARVARD UNIVERSITY

Hereby recognizes the 2018 recipient of the

ROY FAMILY AWARD

*The Advancing Green Infrastructure
Program*

and the project partners

City of New Haven Department of Engineering

Common Ground High School

EMERGE Connecticut, Inc.

Greater New Haven Water Pollution Control Authority

Urban Resources Initiative

Yale School of Forestry and Environmental Studies

For developing and implementing a green infrastructure plan that reduces pollution and urban flooding while creating jobs, building climate and social resilience in the City of New Haven.

This project demonstrates the highest levels of environmental leadership, setting an example for public, private, and non-profit organizations throughout the world.

Presented this fifth day of November 2018
