PROJECT SSF 2021-01: WOODBRIDGE PUMP STATION REHABILITATION

PROJECT AREA: WOODBRIDGE — 66 ANSONIA ROAD AT CORNER OF BROOKSIDE DRIVE

PROJECT OVERVIEW

This project involves total renovation of the existing Woodbridge Pump Station located on Ansonia Road. Work involves replacing the existing wetwell/dry well arrangement with a duplex submersible pump station design. The new design will include replacing the controller cabinet, pumps, rails, valves, and a new back-up generator and fenced enclosure. Above ground controls will be protected at a level of at least 44 inches above the 100-year flood elevation.

BENEFITS

- Restoration of the capacity and the extension of the life of the pump station.
- Increased reliability and resiliency of the pump station.

IMPACTS

- Bypass pumps and piping required to maintain continued operation during construction.
- Staging of equipment and materials at the site.
- Potential minor traffic impacts associated with incoming and outgoing construction equipment and supplies.

Renovations will include new fencing and landscaping.

TIMING AND COORDINATION

Construction Start: February 2023

Duration: Construction is expected to last approximately ten months.

Schedule: Mon-Fri from 8 am to 4 pm and periodic extended hours

**Due to dynamics of construction schedule, weather and other factors, dates and times are subject to change.*
