

CONSTRUCTION NOTIFICATION

WORK IN YOUR NEIGHBORHOOD

PROJECT SSR 2024-04: 2024 PRE-LINING MANHOLE IMPROVEMENTS

PROJECT AREA: NEW HAVEN – WARDS 1, 8, 10, 19 AND 23

PROJECT OVERVIEW

This Project includes manhole improvements to facilitate the rehabilitation of approximately 5,600 feet of brick sanitary sewer pipes built prior to 1900 and ranging in size from 20"x30" to 48". The manholes that require work are on Derby Ave (3 locations), Canner St (5 locations), Elm St (2 locations), and East St (1 location). Enclosed are a project map and individual location maps for general reference. This work prepares access for the Cured-in-Place Pipe (CIPP) lining project scheduled for to begin in June. This work will be notified under separate cover.

BENEFITS

- Rehabilitates aging infrastructure, creating over 50 years of service life.
- Significantly reduces the likelihood of unplanned projects due to infrastructure failure.
- Allows for increased sewer flow capacity, decreasing the likelihood of sewer backups.
- Reduces potential of damage to sewers from future utility construction projects.

IMPACTS

- Some traffic restrictions and night work are expected.
- Parking restrictions may be required.
- Traffic will be guided by construction signs and police/flagman as required per City requirements.
- Contractors shall follow all City of New Haven Traffic and Parking protocol.

TIMING AND COORDINATION

Construction Start: April 2024

Duration: The manhole preparation project is expected to take approximately 3 months.

Schedule: Mon-Fri from 7 am to 7 pm

**Due to dynamics of construction schedule, weather and other factors, dates and times are subject to change.*

NOTICE TO CONTRACTOR:

1. CONTRACTOR SHALL SECURE PROJECT SITE AND IMPLEMENT TRAFFIC CONTROL PLAN BASED ON THE APPROPRIATE CITY OF NEW HAVEN CONSTRUCTION TRAFFIC CONTROL PLANS TEMPLATE.
2. EXCAVATE AND REMOVE THE EXISTING MANHOLE CONE/RISERS TO THE DEPTH SHOWN. CONTRACTOR SHALL PREVENT DEBRIS FROM FALLING INSIDE THE MANHOLE.
3. WHERE THE REQUIRED MANHOLE RECONSTRUCTION IS UP TO 5 VERTICAL FEET (VF), CONTRACTOR SHALL INSTALL A TEMPORARY 48" PVC PIPE RISER, CENTERED ON THE MANHOLE AND EXTENDING TO THE SURFACE OF THE ROAD, AND BACKFILL AROUND IT WITH STONE OR PROCESSED BASE.
4. INSTALL TEMPORARY TRAFFIC PLATE(S)
5. AFTER CIPP LINING REHABILITATION OF THE SANITARY SEWER PIPE BY OTHERS, CONTRACTOR SHALL COMPLETE THE RECONSTRUCTION OF THE MANHOLE PER GNHWPCA STANDARDS BY COMPLETING THE INSTALLATION OF THE MANHOLE CONE SECTION, FRAME AND COVER.
6. FINAL SITE RESTORATION AND PAVING PER CITY STANDARDS.
